Subject Index—Volume 12

A

Abdomen, successive abdominal roentgenograms: a new method of evaluating postoperative small bowel activity, 520
Absorptiometry
  dichromatic, of vertebral bone mineral content, 180
  new in vivo method of quantitating the rate of magnitude of mineralization of an experimental osseous defect, 467
  vertebral and peripheral bone mineral content by photon, 185
Absorption spectroscopy, estimation of chemical composition and density from computed tomography carried out at a number of energies, 189
Adenoma, pituitary, computerized tomography in the evaluation of, 27
Adenosine triphosphate, comparative efficacy of coronary vasodilatory methods, 121
Adenosine triphosphate, comparative hemodynamic effects of coronary vasodilators and contrast material on the normal and ischemic canine myocardium: determination of the optimal agent for clinical augmentation of coronary blood flow, 299
Allograft rejection, microvascular changes in canine renal: a correlative microangiographic and histologic study, 62
Alveolar microphage function, tantalum oxide and, 292
Aneurysms, experimental carotid: I. simple surgical production and radiographic evaluation, 154
Angiography
  clinical experience with saralasin infusion in hypertensive patients, 496
  comparison of renal cortical perfusion assessed with xenon washout technique and, in hydrated and dehydrated dogs: a preliminary observation, 333
  evaluation of the interventricular septum in early reperfusion, 314
  experimental carotid aneurysms: I. simple surgical production and radiographic evaluation, 154
  hemodynamic changes distal to selective arterial injections, 116
  magnification, of internal spermatic and proper hepatic arteries in rabbits, selective catheterization for, 256
  measurement of atherosclerotic luminal irregularity and obstruction by radiographic densitometry, 307
  renal renin and hemodynamic responses to selective renal artery catheterization and, 381
  splenic vein thrombosis in patients with a normal size spleen, 158
  vertebral, one-catheter technique for magnification carotid and, in the rabbit, 373
Arteriography
  coronary, intraventricular conduction during, in patients with pre-existing conduction abnormalities, 505
  coronary, localization of the conduction delay occurring during, 128
Atherosclerosis, dangers of left main coronary artery lesions: angiographic technique and evaluation, 447
Autologous clot, long term follow-up of transcatheter embolization with oxycel, gelfoam and, in domestic swine, 273

B

Blood circulation, hemodynamic changes to selective arterial injections, 116
Blood flow
  arterial, measurement of: assessment of velocity estimation methods, 319
  to rat extremities, a comparison of three radionuclide techniques for measuring, 164
Bone, a new in vivo method of quantitating the rate of magnitude of mineralization of an experimental osseous defect, 467
Bone mineral analysis, using dual energy computed tomography, 547
Bone mineral content
  comparison of CT scanning with photon absorptiometric measurement of, in the appendicular skeleton, 542
  dichromatic absorptiometry of vertebral, 180
  vertebral and peripheral, by photon absorptiometry, 185
Breast cancer, regional and total lung function in patients following pulmonary irradiation, 224
Bronchography, tantalum oxide and alveolar macrophage function, 242
Bypass surgery, regional ejection fractions in patients with patent and thrombosed grafts after coronary artery vein, 205

C

Canine kidney, relationship of perfusion pressure to the microcirculation of the preserved, 338
Cardiac arrest, cerebral water content, blood flow and EEG changes after, in the dog, 325
Catheterization, selective, for magnification angiography of internal spermatic and proper hepatic arteries in rabbits, 256
Cerebral water content, blood flow, EEG changes and, after cardiac arrest in the dog, 325
Cerebrospinal fluid flow, evaluation of, through a Pudenz 12 mm or a standard Rickham reservoir: phantom experiments, 555
Chest phantom, grid versus non-grid techniques for the detection of pulmonary nodules in a, 462
Cholangiography, combined, and cholecystography using sodium iopanoate, 267
Cholecystography, combined, and cholangiography using sodium iopanoate, 267
Cholecystopaques, hepatic excretion of, introduced into the canine jejunum, 106
Chromosomes, a study of T and B lymphocytes and, in breast irradiated mastitis patients, 238
Cisternography, serial, rhinorrhea, ventricular radiopharmaceutical stasis and communicating hydrocephalus: evaluation by, 101
"Clinical problem-oriented" radiology department (guest editorial), 4
Clinical services, impact of a physician assistant in diagnostic radiology (PA-DR) on the delivery of diagnostic radiologic clinic services, 7
Complex motion tomography, film-screen sharpness in, 195
Computerized tomography
  cranial, diatrizoate in: a quantitative study, 21
  estimation of chemical composition and density from, carried out at a number of energies, 189
  gated of the human heart, 563
  in living dogs, selective left coronary myocardiography by, 559
  of ischemic myocardium: quantitation of extent and severity of edema in an in vitro canine model, 215
  of the brain, xenon inhalation as an adjunct to, 15
  quantitative bone mineral analysis using dual energy, 545
  xenon and krypton as radiographic inhalation contrast media with, 19
Congestive heart failure, effect of acute pulmonary edema on pulmonary vascular resistance: significance for the interpretation of dilated upper lobe vessels on chest radiographs, 488
Conjugation, recirculation of iopanoic acid after, in the liver, 537
Contrast media
  biliary and urinary excretion of sodium tyropanoate and sodium ipodate in dogs: pharmacokinetics, influence of bile salts and choleretic effects with comparison to iopanoic acid, 85

comparative efficacy of coronary vasodilatory methods, 121
comparative hemodynamic effects of coronary vasodilators and, on the normal and ischemic canine myocardium: determination of the optimal agent for clinical augmentation of coronary blood flow, 299
double contrast myelography, 552
effects of, on dimensions and hemodynamics of the newborn heart: a study in conscious newborn lambs, 510
fluid compartment distribution of intravenous iothalamate in the dog, 364
iothalamate ethyl ester as hepatolienographic agent, 96
myocardial response to: effects on electrolyte metabolism and subcellular structures, 135
renal renin and hemodynamic responses to selecive renal artery catheterization and angiography, 381
renal vein renin activity in primary hypertension: variability and influence of, 455
xenon and krypton as radiographic inhalation, with computerized tomography, 19
^{51}Cr-EDTA clearance, metrizamide in urography: II. comparison of metrizamide clearance and, in man, 353
CT scanning
comparison of, with photon absorptiometric measurement of bone mineral content in the appendicular skeleton, 542
computerized tomography in the evaluation of pituitary adenomas, 27
diatrizoate in computerized tomography: a quantitative study, 21
quantitative bone mineral analysis using dual energy computed tomography, 545
xenon and krypton as radiographic inhalation contrast media with computerized tomography: preliminary note, 19
xenon inhalation as an adjunct to computerized tomography of the brain: preliminary study, 15

D

Delphi consultations, improving diagnostic accuracy: a comparison of interactive and, 112
Densitometry, measurement of atherosclerotic luminal irregularity and obstruction by radiographic, 307
Diagnostic imaging, role of, in medical education (editorial), 482
Diatrizoate, in computed cranial tomography: a quantitative study, 21
Dose reduction in mammography, 465

E

Edema
computerized tomography of ischemic myocardium: quantitation of extent and severity of, in an in vitro canine model, 215
pulmonary, monitoring and diagnosis of, by microwaves: a preliminary report, 289
EEG changes, cerebral water content, blood flow and, after cardiac arrest in the dog, 325
Electrocoagulation, transcatheter: a therapeutic angiographic technique for vessel occlusion, 146
Electrolyte metabolism, myocardial response to contrast media: effects on subcellular structures and, 135
Ethiodol, evaluation of perfluoroctylbromide for lymphography in the dog: comparison with, 368

F

Film density, influence of, on the radiologic detection of lung lesions, 199
Film-screen sharpness in complex motion tomography, 195
Fluid filled small bowel loops in gallstone ileus: clinical and experimental observations, 357
Foot plantar compartments, a roentgen approach: I. experimental observations, 281

G

Gallstone ileus, fluid filled small bowel loops in: clinical and experimental observations, 357
Gelfoam, long term follow-up of transcatheter embolization with autologous clot, oxycel and, in domestic swine, 273

H

Heart
effects of contrast material on dimensions and hemodynamics of the newborn: a study in conscious newborn lambs, 510
human, gated computed tomography of the, 563
Hemiblocks, localization of the conduction delay occurring during coronary arteriography, 128
Hepatography, and liver lymphography by retrograde biliary ethiodol infusion: an experimental study in the dog, 259
Hypertension
clinical experience with saralasin infusion in hypertensive patients, 496
primary, renal vein renin activity in: variability and influence of contrast material, 455

I

Intraventricular conduction, during coronary arteriography in patients with pre-existing conduction abnormalities, 505
Iodipamide, saturation kinetics of, 175
Iopanoic acid
biliary and urinary excretion of sodium tyropanoate and sodium ipodate in dogs: pharmacokinetics, influence on bile salts and choleretic effects with comparison to, 85
recirculation of, after conjugation in the liver, 537
Iothalamate, intravenous, fluid compartment distribution of, in the dog, 364
Iothalamate ethyl acid, as hepatolienographic agent, 96

J

Jejunum, canine, hepatic excretion of cholecystopaques introduced into the, 106

K

Kidney
canine, effect of intravenous sodium diatrizoate on the function of the transplanted, 81
microvascular changes in canine renal allograft rejection: a correlative microangiographic and histologic study, 62
rabbit, microangiography in the perfusion-fixed: a single injection technique for the study of the nephron, 348
size, relationship between renal lymph flow and changes in, during urography, 251
size, why does kidney size change during I.V. urography, 246
transplants, human, microangiography of rejected, 74
Krypton, and xenon as radiographic inhalation contrast media with computerized tomography, 19

L

Lung lesions, influence or film density on the radiologic detection of, 199
Lymphography
evaluation of perfluoroctylbromide for, in the dog: comparison with ethiodol, 368
liver, and hepatography by retrograde biliary ethiodol infusion: an experimental study in the dog, 259

M

Mammography, dose reduction in, 465
Manometers, dynamic response criteria for fluid-filled esophageal, 515
Medical education, role of diagnostic imaging in, (editorial), 482
Medullary damage, the renal collecting system after, 241
Metrazamide
in urography, II. comparison of ^{51}Cr-EDTA clearance and metrizamide clearance in man, 353
urographic excretion studies with "dimer" and: a high dose comparison in dogs, 169

Microangiography
in the perfusion-fixed rabbit kidney: a single injection technique for the study of the nephron, 348
microvascular changes in canine renal allograft rejection: a correlative microangiographic and histologic study, 62
of rejected human kidney transplants, 74
Microwaves, monitoring and diagnosis of pulmonary edema by: a preliminary report, 289
MTF, separability, focal spots, 36
Myelography, double contrast, 552
Myocardiography, selective left coronary, by computed tomography in living dogs, 559

O

Oxycel, long term follow-up of transcatheter embolization with autologous clot, gelfoam and, in domestic swine, 273

P

Patent ductus arteriosus, nonsurgical closure of: an experimental study, 142
Perception, improving diagnostic accuracy: a comparison of interactive and Delphi consultations, 112
Percutaneous nephropyelostomy, transluminal dilatation and stent placement in obstructed ureters in dogs through the use of, 534
Perfluoroctylbromide, evaluation of, in the dog: comparison with Ethiodol, 368
Perfusion pressure, relationship of, to the microcirculation of the preserved canine kidney, 338
Perirenal masses, comparative diagnostic accuracy of 105 mm versus conventional and magnification radiographic techniques in the arteriographic diagnosis of renal and, 527
Photon absorptiometric measurement, comparison of CT scanning with, of bone mineral content in the appendicular skeleton, 542
Physician assistant in diagnostic radiology (PA-DR), impact of a, on the delivery of diagnostic radiologic clinical service, 7
Porstmann's Method, nonsurgical closure of patent ductus: an experimental study, 142
Portal hypertension, hemodynamic effects of superior mesenteric arterial and intravenous vasopressin infusions in patients with, 210
Pudenz 12 mm reservoir, evaluation of cerebrospinal fluid flow through a standard Rickham reservoir or a: phantom experiments, 555
Pulmonary blood flow distribution (editorial), 479
Pulmonary edema, effect of acute, on pulmonary vascular resistance: significance for the interpretation of dilated upper lobe vessels on chest radiographs, 488

R

Radiation pneumonitis, regional and total lung function in patients following pulmonary irradiation, 224
Radiographic anatomy, effectiveness of small-group, self-instruction in, 486
Radiographic technique, grid versus non-grid techniques for the detection of pulmonary nodules in a chest phantom, 462
Radiology resident as a teacher (editorial), 484
Regional ejection fractions, in patients with patent and thrombosed grafts after coronary artery vein bypass surgery, 205
Renal arteriography, comparative diagnostic accuracy of 105 mm versus conventional and magnification radiographic techniques in the arteriographic diagnosis of renal and perirenal masses, 527
Renal collecting system, after medullary damage, 241
Renal lymph flow, relationship between changes in kidney size and, during urography, 251
Reperfusion, angiographic evaluation of the interventricular septum in early, 314
Research and research funding (guest editorial), 109
Rhinorrhea, ventricular radiopharmaceutical stasis and communicating hydrocephalus: evaluation by serial cisternography, 101
Rossman, Kurt, in memoriam, 4

S

Saralasin, infusion, clinical experience with, in hypertensive patients, 496
Saturation kinetics of iodipamide, 175
Self instruction, effectiveness of small-group, in radiographic anatomy, 486
Selective coronary arteriography, dangers of left main coronary artery lesions: angiographic technique and evaluation, 447
Small bowel activity, successive abdominal roentgenograms: a new method of evaluating postoperative small bowel activity, 520
Sodium diatrizoate, effect of intravenous, on the function of the transplanted canine kidney, 81
Splenic vein thrombosis in patients with a normal size spleen, 158
Subcellular structures, myocardial response to contrast media: effects on electrolyte metabolism, 135
Superior mesenteric artery, hemodynamic effects of, and intravenous vasopressin infusions in patients with portal hypertension, 210

T

T and B lymphocytes, a study of chromosomes and, in breast irradiated mastitis patients, 238
Tantalum oxide and alveolar macrophage function, 242
Television, arterial blood flow measurement: assessment of velocity estimation methods, 319
Transplant rejection, human kidney, microangiography, 74
Tubular opacification, microangiography in the perfusion-fixed rabbit kidney: a single injection technique for the study of the nephron, 348

U

Ureteral obstruction, transluminal dilatation and stent placement in obstructed ureters in dogs through the use of percutaneous nephropyelostomy, 534
Urography
excretion studies with metrizamide and "dimer": a high dose comparison in dogs, 169
excretory, respiratory effects of: a preliminary report, 295
metrizamide in, II. comparison of ^{51}Cr-EDTA clearance and metrizamide clearance in man, 353
relationship between renal lymph flow and changes in kidney size during, 251
why does kidney size change during I. V. urography, 246

V

Vessel occlusion, transcatheter electrocoagulation: a therapeutic angiographic technique for, 146

X

Xenon
and krypton as radiographic inhalation contrast media with computerized tomography, 19
inhalation, as an adjunct to computerized tomography of the brain: preliminary study, 15
washout technique, comparison of renal cortical perfusion assessed with angiography and, in hydrated and dehydrated dogs: a preliminary observation, 333
Xenon-133
comparison of three radionuclide techniques for measuring blood flow to rat extremities, 164
regional and total lung function in patients following pulmonary irradiation, 224
X-ray focal spots
field characteristics, 54
models, 44
MTF separability, 36
